Abstract (en)
[origin: WO2012085858A1] A liquid detergent dispenser for a washing machine comprising: -a tray (2) for containing the liquid detergent and comprising a lower base (20) and lateral containment means (21) designed to receive the detergent; -a siphon (3) at least partly extending from the lower base (20) of the tray (2) for allowing the discharge of at least part of the liquid detergent located in the tray (2), the lateral containment means (21) comprising an opening (22) for allowing an additional discharge of the liquid detergent; -means (4) for regulating the flow of liquid detergent through the opening (22), the regulating means being able to move between a first and a second configuration. The regulating means (4) comprise a body (40) which in turn comprises a first panel and a second panel (41, 42), the first panel and the second panel obstructing the opening (22) respectively in the first and second configurations of the regulating means (4); the first panel (41), when the regulating means (4) are in the first configuration, obstructs the opening (22) more than the second panel (42) when the regulating means (4) are in the second configuration.
