Abstract (en)
[origin: WO2012085839A1] An electrical household appliance for drying laundry, comprising : i) a drying compartment (2); ii) a line (3) for extracting a gaseous fluid from the drying compartment (2), the extraction line (3) comprising a condenser (4) which allows the condensation of at least a part of the vapour present in the gaseous fluid. The condenser (4) comprises: -a channel (41) for the passage of the gaseous fluid from the drying compartment (2); -a channel (42) for the passage of a refrigerant fluid. The condenser (4) comprises a condensing wall (40) which separates the channel (41) for the passage of the gaseous fluid from a first stretch of the channel (42) for the passage of the refrigerant fluid.
