Abstract (en)
[origin: WO2012072577A1] The invention relates to a mounting device for securing facade elements to a wall (3), comprising a first mounting bracket (1) and a second mounting bracket (2). The first mounting bracket (1) has a first limb (4), which is to be secured to the wall (3), and a second limb (5, 5'), on which a mounting strip for facade elements can be secured. The second mounting bracket (2) likewise has a first limb (6), which is to be secured to the wall (3), and a second limb (2), which is arranged at an angle (a) between 20° and 70° relative to the second limb (5, 5') of the first mounting bracket (1), wherein the second limb (5, 5') of the first mounting bracket (1) is positively (19, 20) supported on the second limb (7) of the second mounting bracket (2).
