Abstract (en)

[origin: CA2821875A1] The invention relates to a heating module for heating solid material, such as balls (B), up to a predetermined temperature, characterized in that it includes: a heating trough (M1) including a crucible (M11) for receiving the material to be heated, and a burner (M13) for heating the crucible (M11) and the material to be heated; and a cover (M2) that is removably mounted on the heating trough (M1) in order to close the crucible (M11).
