Abstract (en)

[origin: WO2012097791A1] The invention relates to a housing according to one of claims 1 to 14, characterized in that at least two spring elements, in particular two snap discs or two leaf springs, which are designed complementary to each other, are arranged one over the other inside the microswitch (26), wherein leaf springs are arranged in order to ensure the required actuating force. The invention further relates to a push button switch, in particular for a tailgate (16) of a motor vehicle, comprising a housing (12) according to one of claims 1 to 16 and a push button (20) which is pivotably connected to the housing (12) for switching the switch element (26).
