Abstract (en)
[origin: WO2012084458A1] The invention relates to an electrical plug connector (1) having a plurality of metal contacts (5) arranged parallel to each other for electrically contacting metal contact pins (2) of a mating plug (3), wherein according to the invention a separate contact terminal (10) is arranged upstream of at least one of the contacts (5), electrically conductively contacting the at least one contact (5) and implemented for penetrating a contact pin (2).
