Abstract (en)

The ejection device (1) has a pivotally mounted lever (2), which is biased by a spring in an ejection direction. A latching mechanism is arranged at the lever. The latching mechanism locks the lever in a closed position against the force of the spring. A control element is mounted on the lever, and is guided in a curve guide. An independent claim is also included for a shear device, particularly for furniture or household appliances.

Abstract (de)

Eine Ausstoßvorrichtung (1), insbesondere für bewegbare Möbelteile, umfasst einen verschwenkbar gelagerten Hebel (2), der über eine Feder (17) in eine Ausstoßrichtung vorgespannt ist, wobei an dem Hebel (2) ein Rastmechanismus (11, 20) angeordnet ist, mittels dem der Hebel (2) in einer Schließposition gegen die Kraft der Feder (17) verrastbar ist. Dadurch kann die Ausstoßvorrichtung (1) besonders kompakt aufgebaut sein
