Abstract (en)

[origin: WO2013109013A1] The present invention relates to an automatic medicine packaging apparatus which automatically discharges the necessary medicine, according to a prescription by a doctor or a pharmacist, from a plurality of medicine cassettes and packages the medicine in doses. The automatic medicine packaging apparatus according to the present invention, which continuously packages various medicines accommodated in the plurality of medicine cassettes in doses, comprises a plurality of cassette cradles which are installed in a withdrawable manner at the upper portion of the automatic medicine packaging apparatus. A shelf is disposed on one side of the cassette cradle so as to arrange the medicine cassettes, and a passage member is disposed on the other side thereof so as to guide the medicine discharged from the medicine cassette.
