Abstract (en)

[origin: EP2657150A1] The strapping arrangement has multiple cylindrical piece goods, particularly cylindrical drums (2,3,4,5), arranged on a pallet (6), where the cylindrical drums are arranged with one of its front sides in a vertical manner and are combined together with the pallet to a transport unit (1). The strapping (15,16,17,18) is guided over a front-sided upper surface of one of the piece goods. The upper surface of one of the piece goods is present against the lower side of the pallet. Independent claims are included for the following: (1) a method for producing a strapping arrangement for multiple cylindrical piece goods, particularly cylindrical drums; and (2) a strapping system with a receiving unit.
