Abstract (en)

[origin: EP2657444A1] The frame has a holding element (7) i.e. clip, fastened at a plastic hollow section (5), which is provided with undercuts (11, 15). A metal profile (6) comprises profile legs (8, 16) co-acting with the holding element for a positive connection with the plastic hollow section. The profile legs are formed in a T-shape, and comprise a detent (12) positively engaging with the undercuts of the plastic hollow section, where the detent is attached to a detent head (9). The plastic hollow section comprises a springing back retainer (13) into which the holding element is inserted.
