Abstract (en)
The solution to Manage the Paid Public Parking is characterized by identifying every parking place by a unique area code plus a place code, then the user (1) only needs a smartphone or mobile phone (2) to interact with the Management System (4)(5) and register the beginning and the end of the place occupation, so that the Management System (4)(5) can withdraw the corresponding parking fee from the user account. The fiscal agents (6) job will significantly change and they will have a performance increase from this new method, with the corresponding productiveness increase to the concessionary of the public parking.
