Abstract (en)  
[origin: EP2657928A2] The processing apparatus (1) has a movable holding unit (3) that is arranged relatively to the housing (2). The shaping blank and processing tool (5) are connected with the holding unit. The processing tool is arranged to supply liquid such as water, in a processing area of the shaping blank. The processing area is separated from the housing by partially surrounding the processing area with a cover unit (6).
