Abstract (en)

[origin: WO2012126551A1] The invention relates to an item of clothing in the form of trousers (1) for use outdoors and/or in hunting, having two trouser legs (2, 3) and a device for protecting against pests. In order to provide effective protection against pests, as a device for protection against pests, an internal insert (4) preventing the passage of pests, in particular ticks, is provided in at least one trouser leg (2, 3), the lower end (5) of which insert reaches as far as the foot area (6) of the user and the upper end (8) of which is permanently connected or can be detachably connected to the trouser leg (2, 3) on the inside, wherein the connection at the upper end (8) is closed circumferentially in such a way that passage of the pest through the connection (9) is not possible.
