Abstract (en)
[origin: WO2012092548A1] Systems and methods include a first interchangeable segment having first and second ends separated by a first length. The first interchangeable segment may include a first connector at the first end and a second connector at the second end. A second interchangeable segment may have third and fourth ends separated by a second length. The second interchangeable segment may include a third connector at the third end and a fourth connector at the fourth end. The first and second interchangeable segments may connect to at least partially encircle a user.
