Abstract (en)

[origin: WO2012089362A2] The invention relates to a pressure transmission system (5, 5') for a power-assisted braking system (1, 1') in a vehicle. The input (6, 6') of said transmission system can be hydraulically operatively connected to a master cylinder (4, 4') of the power-assisted braking system (1, 1') and the output (7, 7') of the transmission system to a wheel-brake cylinder (8, 8', 13, 13') of the power-assisted braking system (1, 1'). The pressure transmission system (5, 5') comprises an accumulator (15) and linkage (16), the linkage transmitting a differential pressure between the input (6, 6') and the output (7, 7') to the accumulator (15) and storing said pressure in the latter.
