Abstract (en)
[origin: WO2012090233A1] There is disclosed a labelling group (5) for applying labels (2) to relative articles, comprising a first support structure (16); a second support structure (17); first support structure (16) supporting either an unwinding element (10c) for unwinding a strip (10b) of labels (2) along an advancing path (Q) or a cutter (11) which may be fed with a strip (10b) of labels and is adapted, in use, to cut a single label (2) from strip (10b); a gluing element (12) which is supported by second support structure (17) and applies, in use, glue onto cut label (2); the labelling group (5) may be selectively arranged into: a first configuration in which first support structure (16) is fixed to second support structure (17); or in a second configuration in which at least one of first and second support structure (16, 17) may rotate relative to the other one of first and second support structure (16, 17).
