Abstract (en)
[origin: WO2012090137A1] A reservoir cap for extemporaneous preparations, having easy- open and improved safety features. The reservoir cap (1) comprises a compartment (5) having a bottom (52) and a sidewall (51). A weakened line (55) joins the sidewall to the bottom. A punch (2), comprising an edge (24), is capable of rupturing the weakened line (55). A removable seal (6) comprises means to prevent the punch (2) from moving, relative to the compartment (5), in a direction opposite to the direction it follows to rupture the weakened line.
