Abstract (en)

[origin: WO2012091349A2] A method for provisioning a contactless card applet in a mobile device with a mobile wallet application, including activating the mobile wallet application, connecting to a Trusted Service Manager (TSM) system, synchronizing the mobile wallet application with the TSM system, displaying a contactless card applet based on attributes of the mobile device, receiving a selection of a contactless card applet, retrieving a widget and a wallet management applet (WMA) corresponding to the contactless card applet, and provisioning the selected contactless card applet, the widget, and the WMA. A wallet management system (WMS) in a non-transitory storage medium to store and manage mobile wallet account information including a wallet client management component, a widget management component, a device profile management component, and a rule engine.
