Abstract (en)  
[origin: WO2012089350A1] A collective connection apparatus (1) for connecting a plurality of conductors, wherein the connection apparatus has a number of connection terminal strips (2), that can be arranged in a row or are arranged in a row, which preferably corresponds to the number of conductors that are to be connected, said connection terminal strips each having disc-like insulating-material housings (3) which can be arranged in a row and in each case at least one conductor connection (4) which is arranged in the insulating-material housing (3) and a busbar spring connection (6) for making contact with a busbar (7) which passes through the connection terminal strips in a cross-connecting manner, wherein the busbar spring connection (6) is arranged in each case in or on an operating element (6) which can be moved on the insulating-material housing (3).
