Abstract (en)

[origin: EP2659790A1] Provided is a food containing milk ceramide that solves the problems of sedimentation and non-uniformity within the food. Also provided is a process for producing the food. Milk ceramide is transformed into a paste and added to a food. In this manner, it becomes possible to add 0.3-10.0% of milk ceramide to a food homogeneously without causing precipitation. Thus, a food can be provided, which contains milk ceramide homogeneously in such an amount that cannot be achieved by conventional techniques without causing sedimentation.
