Abstract (en)

[origin: EP2545966A2] The heel unit (10) is adjustable between a walking position, which is aligned to engage a heel section of a tour ski shoe, and a downhill position, which is aligned to release the heel section of the tour ski shoe. A base part (12) is arranged for mounting on a touring ski, where a binding element (16) is arranged for coupling to heel section of the touring ski shoe. The binding element is prestressed in the downhill position by influence of a spring unit towards tour ski shoe.
