Abstract (en)
[origin: EP2660411A2] The key head cover comprises two cover elements (5,6), which are connected with each other by two fixing units (10,20) that are engaged when the casing elements are stuck together. The fixing unit at a side has a projection projecting across the direction of the cover elements. The projection of the fixing unit lies in the recess assigned to it, when the projection is stuck together with the cover element. The end section (11,21) of the fixing unit is attached to a retainer wall (19,29) with its side turning away from the projection.
