Abstract (en)
[origin: EP2660417A1] Sub-frame for sliding doors made up of at least one upper crossbeam (1), a lower crossbeam (12), and at least four vertical mountings (16) parallel and opposed between each other two-by-two; wherein said upper crossbeam (1) incorporates a number of folded flanges that form an upper track (6) and two side tracks (7) and further incorporates a first inside element (2), a second side element (3) on each side comprising grooves on the upper and lower part, and wherein at least two hitching elements (4) are disposed on said upper part in addition to at least two fastening elements (5) on each side of the upper crossbeam (1); and wherein the lower crossbeam (12) has a U-shape section and wherein the side channels (14) are equal and are narrower than the central channel (15), with the lower crossbeam (12) having numerous holes (13) along its edges, so that it is adjustable in height and width.
