Abstract (en)
[origin: EP2660544A2] The refrigerating and freezing apparatus (1) has interior space and closing element. The closing element is provided to close cooled interior space. The drive unit is driven by opening unit (2,3) to open closing element. The drive unit and the opening unit are connected with each other by cable, such that traction force is applied by the drive unit to the cable and mechanical movement of the cable of the opening unit is generated.
