Abstract (en)
[origin: WO2012093203A1] The invention relates to a building element for apartment buildings and detached houses, comprised of a fully or partially covering building panel (2, 4, 6, 8) made, for example, from a plaster and paper mixture, alternatively of glass fiber, wood fiber or cement-based panels to be fixed to wood/steel studs. The panels (2, 4, 6, 8) are fixed to the studs (1.1, 1.2, 1.3) by gluing (1) and screwing/nailing according to a NO building system, whereby the method results in airtight cells (1 - 12) throughout the building element.
