Abstract (en)

[origin: WO2012093202A1] A method comprises updating, by an apparatus, a media presentation description file, associated with media content streamed to one or more client devices using hypertext transfer protocol; and embedding, within one or more media segments of the media content, an indication of the update of the media presentation description file. At least one of the one or more media segments is provided, upon a request, to at least one of the one or more client devices.
