Abstract (en)
[origin: EP2662065A1] The device has a blinding cover (1) completely surrounds a container (2) and comprising an axially movable and twistable lid (5). The lid is provided with a gripping element (15) for gripping the sealing cap and with a sampling point for a sampling needle such that the sealing cap is removed from the container and the sampling point is positioned above the open container by axially moving and twisting the lid. The blinding cover consists of a center part (3) and a bottom (4) inserted at a lower end of the center part. The lid arranged on an upper side of the center part.
