Abstract (en)

[origin: EP2662121A2] The front unit (100) comprises a holding unit, which is adapted for engaging an aquaplane shoe and holding around a transverse axis running transverse to an aquaplane longitudinal axis swiveling at an aquaplane attachment. The front unit is adjustable in a passive position different from the opening position and the closed position, in which the holding unit is set to an aquaplane in a flat configuration. The adjustment of the front unit is carried out in the passive position into the pivotal movement of the holding unit. An independent claim is included for an aquaplane attachment comprises a heel unit.
