Abstract (en)  
[origin: EP2662192A1] The present document discloses a floor panel comprising a decorative layer (13), and a core layer (10, 11) arranged below the decorative layer (13) when the floor panel is substantially horizontally oriented. The core layer comprises a plurality of wood blocks (10) arranged with their respective principal fiber directions substantially parallel with a plane (So) defined by a major surface of the floor panel and substantially perpendicular to a principal direction (L) of the floor panel. The core layer (10, 11) comprises a plurality of second material blocks (11), made from a different material than said wood blocks (10). Along the principal direction (L) of the floor panel, the core layer presents alternating portions formed of said wood blocks (10) and of said second material blocks (11).
