Abstract (en)
[origin: EP2662634A1] The household appliance (1) has a treatment chamber (3), a movable device (4) and a liquid conveying device (6). The conveying device is drivable connected to the movable device. A pumping device (16) is equipped in the conveying device, and is designed as bellow pump (26), diaphragm pump or piston pump. The movable device is designed as a locking door (5) in the treatment chamber. A clockwork device is operatively connected with the locking door. An independent claim is included for a method for operating household appliance.
