Abstract (en)  
[origin: EP2662648A1] The cabinet has a front door that is installed in the closed cooling chambers. A lid (7) is arranged for selectively opening and closing the container (4) based on the operation setting position of the cabinet portion. The lid is guided in a closed position and an open position by a guide unit, for providing a gap between the lid and the opening edge of the container. A closable opening (10a) is formed in the surface (7a) of the lid.
