Abstract (en)  
[origin: WO2012095610A1] The invention relates to a luminous net, for example for sports equipment consisting of flexible elongate elements (10) that are contiguous at specific points, characterised in that at least some (10) of said flexible elements are luminous, and each consists of: an elongate sheath (100) which is transparent to light and made of a synthetic material; a series of luminous members (102) distributed in the elongate sheath (100) in at least one row; and a flexible reinforcing cord (101) which is arranged in the sheath (100) and which extends across the entire length thereof, and which is capable of imparting tensile strength to the flexible element (10), the length of said cord in the sheath being equal to the length of said sheath.
