Abstract (en)

[origin: WO2012095595A2] The invention relates to a vehicle (2) including a plurality of onboard electrical power sources (6, 8, 10) connected together by a voltage bus (14), said vehicle further including a means for controlling the voltage of the bus (14), characterized in that the control means includes at least one ultracapacitor (10) connected to the voltage bus (14), said ultracapacitor (10) forming a part of the plurality of sources.
