Abstract (en)

[origin: WO2012097176A1] Systems and methods for installing a motorized window shade assembly on an aircraft window panel having fastener receiving elements and an electrical access port. A receptacle frame includes a front face bounded by side walls defining a volume for receiving the window shade assembly. The frame further includes a rear face having window panel fasteners adapted to engage with the fastener receiving elements of the aircraft window panel and adapted to secure the receptacle frame to the aircraft window panel. The frame further includes window shade assembly fasteners positioned on at least a first pair of the side walls and adapted to secure the window shade assembly within the volume for receiving the window shade assembly.
