Abstract (en)
[origin: WO2012095135A1] The invention relates to (cigarette) packs having an inner pack (27) in the form of a sealing pack, wherein said packs comprise a closure tab (23) in the area of a removal opening (22). The closure tab (23), which is fixed by gluing, can be gripped using an adhesive-free gripping tab (26). In order to improve the presentation of the gripping tab (26), a projection is provided in the area of the gripping tab on the inner pack or on a collar, such that at least one tab rim (32) of the gripping tab (26) is exposed for gripping. In addition, support edges can be provided in the area of the inner side of a cover front wall (15), which support edges deform the gripping tab (26) during the opening of the cover (11).
