Abstract (en)
[origin: WO2012095380A1] The present invention relates to solar control glazings comprising on at least one of the faces of a glass substrate a system of layers comprising at least one infrared-reflecting functional layer and dielectric layers surrounding the infrared-reflecting layer, the infrared-reflecting layer being a metallic layer of tungsten, the system comprising, between the substrate and the functional layer, at least one layer of aluminium nitride or of silicon nitride, and a layer of silicon nitride on top of the functional layer.
