Abstract (en)

[origin: WO2012095522A1] The invention relates to a method for providing, to an observer, data relating to at least one user of a telecommunications service provider or Internet service provider in a network (1), said method involving said observer sending a request (9, 13) to said provider in order to obtain data in response to said request, said method further involving: analyzing the data requested by said observer in response to said request; automatically generating a new request (22, 23) on the basis of said analysis; and using said new request such that said provider transmits, to said observer, new data in response to said new request.
