Abstract (en)
A reinforced metallic shelf for a modular shelving structure, comprising a support plate (2) with an upper surface (3), a lower surface (4) and an inwardly folded peripheral edge (5) having longitudinal sections (6', 6'') substantially parallel and mutually joined by opposed transverse sections (7', 7''), and at least one substantially transverse reinforcement member (8) adapted to be associated with the lower surface (4), having opposed ends (9', 9'') which are adapted to be anchored to the longitudinal sections (6', 6'').
