Abstract (en)

The crockery basket (1) has multiple receiving ribs (3), which are arranged parallel to each other and are molded in a plane, and a wavy wire (4), which extends perpendicular to the receiving ribs. The wavy wire has multiple successive individual waves (5), which consist of wave crests (6) and wave troughs (7) and are symmetrical to each other. Each individual wave and each wave crest or wave trough are formed in an asymmetrical manner. The receiving ribs intersect the wavy wire in a wave trough in each case.
