Abstract (en)

[origin: WO2012099526A1] The present invention relates to a container (14) for impregnation of cleaning articles (13), the container comprising a water-tight pouch made of a textile material or a plastic material. The container is closable and is adapted, before being closed, to receive a number of cleaning textiles and also water or cleaning fluid (18), and, after being closed, to be turned upside down for impregnation of the cleaning textiles. The invention also relates to a cleaning system and method for impregnation of the cleaning textiles.
