Abstract (en)  
[origin: WO2012098402A1] A brewing device, particularly for brewing tea or coffee. In one embodiment, the steeping portion (11) is formed with the handle (10) and the squeezing means includes an actuator element (13) arranged to extend through the handle. Such a device is thus arranged to compress the steeping portion by means of a pulling action on the actuator element. In an alternative embodiment, the squeezing means is formed with the handle (51) and the steeping portion is formed with an actuator element (54) arranged to extend through the handle. By such an arrangement, the device is arranged to compress the steeping portion by means of a pushing or pressing action on the actuator element.
