Abstract (en)
[origin: WO2012097921A2] The invention relates to a method for producing poly(meth)acrylimide foams, to blocks, panels and the like made of such poly(meth)acrylimide foams, and to the (meth)acrylic acid-(meth)acrylonitrile copolymer molded bodies obtained as intermediate products, wherein all said foams and products made of said foams are characterized by a particularly low residual monomer content.
