Abstract (en)
[origin: CA2819196A1] The invention relates to a method for ballast tamping a railway track by introducing a manual tamper (1) in the ballast. Before being introduced in the ballast, the manual tamper (1) is detachably connected via a fixation element (15) - which is attached to a tamping section (6) located between a drive motor (3) and a tamping blade (5) - to an anchor element (10) which is located opposite with respect to a tamping movement (18) and fixed to the railway track (9).
