Abstract (en)

[origin: WO2012097980A1] The invention relates to a battery (10) having a plurality of battery cells (12) which form a cell stack (14) which stands on a base plate (18) of the battery (10). At least one cotter (20, 22) serves to brace the battery cells (12) against one another. The at least one cotter (20, 22) and the cell stack (14) are secured in their position relative to the base plate (18) by means of at least one clip (24) which is fitted to the base plate (18). Manufacturing tolerances of the battery cells (12) can be compensated for by the at least one cotter (20, 22), and the clip (24) secures both the cotter (20, 22) and the cell stack (14).
