Abstract (en)
[origin: EP2666882A1] The present invention relates to a hot dipped galvanized steel sheet with excellent adhesive brittleness even at ultra-low temperatures and excellent deep drawing properties and a method for preparing the same. The present invention relates to a hot dipped galvanized steel sheet with excellent deep drawing properties and ultra-low temperature adhesive brittleness, wherein the average diameter of crystal particles of a hot-dip galvanizing layer is 150-400 µm, and the degree of the preferred orientation with respect to the (0001) face of the hot-dip galvanizing layer is 3,000-20,000 cps (counter per second), and a preparation method thereof.
