Abstract (en)

Disclosed herein is a washing machine including a housing (10), a tub (20) disposed within the housing (10) to retain water, a spin basket (30) rotatably installed in the tub (20), a detergent feeding device (70) to supply detergent and water to the tub (20). The detergent feeding device (70) includes a detergent housing (700) installed in the housing (10), a detergent case (710) installed in the detergent housing (700) to store liquid detergent, and a detergent introduction module (730) to introduce the liquid detergent stored in the detergent case (710) into the detergent housing (700). As the detergent introduction module (730) is installed on the outer surface of the detergent case (710), placement of electrical components inside the detergent case (710) is avoided.
