Abstract (en)

The covering has extruded profiles (1) formed from a mixture of natural substances and a polymeric material. The extruded profiles comprise upper surfaces (2), and supporting elements for the extruded profiles are provided on opposite lying lower sides, where the extruded profiles are held at the supporting elements over a plug connection part. The extruded profiles are fastened to the supporting elements over latching units (6), where the supporting elements are connected with each other in a direction perpendicular to a longitudinal direction of the extruded plate. The supporting elements are connected with other by a bendable, wound bar connection unit i.e. tape, which is made of weather-proof material.

Abstract (de)

Bodenbelag, insbesondere für den Außenbereich, mit mehreren extrudierten Platten (1) aus einer Mischung aus Naturstoffen und einem Polymerwerkstoff, wobei die extrudierten Platten (1) eine begehbarer Oberfläche (2) aufweisen und auf einer gegenüberliegenden unteren Seite mehrere Trägerelemente (8) für die extrudierten Platten (1) vorgesehen sind, wobei die Platten (1) an den Trägerelementen (8) über eine Steckverbindung gehalten sind, dadurch lässt sich der Bodenbelag einfach montieren.
