Abstract (en)

[origin: EP2666953A1] The fastener (10) has a fastener link (16), an intermediate link (18) and a coupling link (20) that are hinged together. The fastener link comprises a fixing unit (26) at a winding axis (14). The coupling link is provided with a connecting unit (28) with a cover (12) for a roller shutter. The fastener link is connected to the intermediate link by a hinge (22). The intermediate link is connected to the coupling link by another hinge (24). The hinges connect the links in a fully demountable manner. The hinges are provided with hinge units. An independent claim is also included for a method for manufacturing a fastener.
