Abstract (en)  
[origin: EP2667459A1] The assembly has a magnet (13) generating a magnetic control flux attracting a mobile magnetic element (23) and moving electrical contacts (21, 22) between internal and external positions. A magnetic control unit comprises a magnetic cylinder head composed of two parts (33A, 33B) placed in an electric card (10) and a base (20), respectively. One of the parts includes the magnet, and the other part is connected to the magnetic element by a sliding axial gap (E2). The flux circulates through the parts, the magnetic element and the gap.
