Abstract (en)

[origin: WO2012101111A1] The invention relates to a device and method for producing two- or multi-color molded skins (2, 2'), in particular skins for a molding or component. According to the invention, a tub (4, 4'), in which at least two different materials (M1, M2) can be arranged separately from one another, and a galvanic mold (3, 3') forming a molding or component can be positioned relative to one another, wherein a separating element (5 to 5''), which separates the materials (M1, M2) and protrudes over the tub (4, 4'), is introduced and positioned in the galvanic mold (3, 3'), and subsequently the materials (M1, M2) are introduced separately from each other by means of the separating element (5 to 5'') in at least one layer in the galvanic mold (3, 3').
